A spectacular country Italy...

Firstly recognizing different cultures, societies and people are very significant and necessary. Italy is strongly worth-seeing country . It includes lots of great architectural buildings and touristic places like Collesium, Tower of Pisa and cathedrals... Except that Italy has a lot of different art branches, such as music, sport, science, cinema, visual arts and cuisine. In my opinion Italy is a country which is attractive with its cultural heritage and its own quality .

It is a really useful and educational project to improve our English. Also this is a big opportunity for me to meet new cultures and people. In this reasons you can get experiences and useful information. I think we should continue this friendship in the future, too.

With this project; We can find the opportunity of recognizing such a beautiful and different country like Italy. Searching different culture and religion is improving us. Being in communication makes the relationship stronger between Turkey and Italy .

Such an experience is very useful to get to know new people. Italy has a historical atmosphere like Turkey and we would like to be in it. Italy has not only historical places but also different natural beauties as well. For example we heard about forest, rivers and lakes (Lake of Orta) etc. We also want to see your medieval cities. These are just small part that we know about Italy.

We are sure that a lot of things are waiting us. In the future , if we can find the chance to go to Italy with the help of this project, we will wait for your helps.

Italy is a really wonderful country. Beside Venice, Roma the capital of Italy, is so fantastic and impressive. Palaces, bridges and churches.. Italy is full of with historical beauties. I can say that Italy is worth to go and see. If I go there one day, I will walk around there all day and I will go shopping and of course I want to eat pizza! It will be the first thing that I will do when I arrive there .

I am so happy for taking part in such a good project. Because I belive that seeing different cultures is very important for a person. And meeting people from different nationalities will be a good experience for me. I wish that everyone would have this chance...

I like learning foreign language and searching other countries so I am happy to take part in this project. I have learned some information about Italy with the help of this project. I can say that the capital of Italy is Rome which is a historical city. Also it has more important features. It is the political, religious and cultural centre of Italy . It has a lot of historical buildings. Especially, I wonder of Cathedrals which are glorious.

In conclusion the project is very useful for me and working for it is very funny.
